How does the rewards system (\$ASK) work for families?

Permission Support - 2026-04-21 - [AI for the Family](#)

Permission includes a structured digital reward system called \$ASK that helps families reinforce positive behavior. Children can earn ASK for responsible digital habits and family-aligned goals. Parents remain fully in control of how rewards are defined, earned, and used.

ASK gives parents a practical way to motivate and guide their children — connecting actions to outcomes in a clear, consistent way.

At the same time, it introduces kids to digital responsibility and financial literacy, helping them understand value, ownership, and long-term thinking in a modern digital world.
